GLM-B maxx 120

BIZERBA

GLM-B maxx 120 ... simply a better experience with every label.
The automatic Bizerba weigh price labeler GLM-B maxx 120 makes things easy for you: It can be easily integrated into conveyor systems and data systems and thus ensures correct labeling from the case to the pallet. And with the Intel® Atom™ it fulfils both current and future requirements.

More information
High performance with a wide range of solutions and options.

Product description

Devices of the GLM-B series can be used as OEM belt labeler in stand-alone operation or can be directly controlled by EDP systems. Thanks to the Bizerba system design, it is also suitable for use as a total value printer for price labeling lines and checkweigher lines. Since it smoothly integrates into existing conveyor technology the Ethernet-capable GLM-B maxx can also be used in connection with the dynamic scales Bizerba CWL-Eco flexx and in Bizerba DWS systems (dimensioning, weighing, scanning). In the GLM-B maxx, label rolls with a diameter of up to 300 mm can be processed. Thus retrofitting time is reduced - especially with large labels. The printers are network compatible and can also be controlled directly via the Internet. The new PC-based hardware provides more memory space and fast label data processing. The operating terminal GT-7C with color display can be operated ergonomically and thus reduces operating errors. Optionally, an operating terminal with color touch display is available.

GLM-B maxx 120S

Highlights

– Flexible fields of application for labeling of cases, boxes and pallets in production, warehousing and distribution logistics
– Operating terminal GT-7C with 7" color display, optionally GT-12E or GT-12C with 12" color touch display
– Printing of UNICODE fonts
– 2GB memory on board for layout and logos
– Program updates, line backups, backup and service printouts are possible with the external USB port.
– Thermal direct and thermal transfer print
– Printing and processing of any one and two-dimensional standard barcodes,
– among other things data matrix and QR code
– Easy label roll change (Ø up to 300 mm)
– Servicing of printer unit w/o tools (e.g. replacing thermal printhead, pressure roller)

GLM-B maxx 120T

12" color touch display GT-12E

Options

– Thermal transfer device
– Printing mechanism 80 mm (optional width 104 mm)
– Mounting stand
– 12" color touch display
