

*The labeling of nutrition values according to the Food Information Regulation (FIR) will be mandatory from December 13, 2016 on. Our powerful Nutrition Package, consisting of `_bld.BRAIN 9.0` and `_dataMaintenance.BRAIN 3.40`, enables you to optimally create nutrition value charts and nutrition value input.*

### Produktbeschreibung

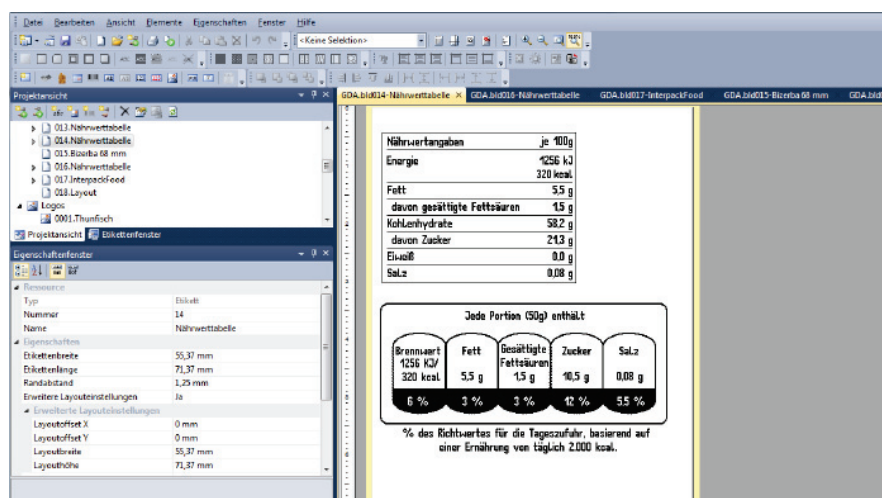

The new Food Information Regulation (FIR) governs food and nutrition value labeling uniformly for Europe (EU Regulation No. 1169/2011). According to this the rules of the general food labeling law apply from December 13, 2014 on, the rules of nutrition value labeling are binding from December 13, 2016 on.

Our Nutrition Package, consisting of the software `_bld.BRAIN 9.0` and `_dataMaintenance.BRAIN 3.40`, supports you efficiently in fulfilling these regulations.

The package enables the realization and creation of nutrition value charts and the input of nutrition values.

The Label Designer provides you with templates (patterns) to create nutrition value charts and GDA information on labels.

The master data management tool allows you to enter nutrition value details in the form of charts per article. Moreover, `_dataMaintenance.BRAIN` offers an assistant that guides you in entering nutrition values.

### Highlights

- Compliance with the EU Food Information Regulation (FIR)
- Optimal creation of nutrition value charts and nutrition value input
- Entering of GDA information
- Simple, automated realization, reduction of mistakes
- Label Designer templates (patterns):
  - Three GDA graphics
  - Two nutrition value charts
  - One identification mark
- Master data management:
  - Management of nutrition value data per article
  - Simple input of GDA information and nutrition value data
  - Automatic calculation of details per portion size
