High performance
with a wide range of
solutions and options.

Product description

With a complete series of standard functions BRAIN2 Capture offers many possibilities to record and evaluate data of connected BIZERBA equipment such as checkweighers, weigh price labelers and inspection systems. This software collects individual values, total data records, information on detected metal objects as well as metal detector audits and saves them in a central SQL database. Due to detailed reports as well as the possibility to provide data via web service and CSV file, this software can be easily integrated in an existing process world.

Functional features

- Collection of individual data records, total data records, detected metal objects and metal detector audits
- Collected data can be exported as a CSV file (Excel)
- Web service as interface for programmers
- Reporting as PDF
 - Batch evaluation
 - Evaluation of daily production
 - Packages below nominal value
 - Give-away report
 - Rejected packages (metal detected)
 - Overview metal detector audit

Integration in business processes

The BRAIN2 capture software provides you with the collected production data of your Bizerba equipment via reports and various interfaces. Via a web service interface, data is accessible for IT staff, programmers or 3rd party software houses and thus for business processes. Besides individual data records, total data records or detected metal objects can be evaluated and further processed.

BRAIN2 - optimized processes

- The dynamic design of BRAIN2 and the freely selectable applications allow you to clearly arrange and individually design the user interface. As a result you benefit from a more efficient and easier operation
 - With the available Bizerba modules you dimension and adapt BRAIN2 Framework to fit your production. Misinvestments due to partially unused software packages are avoided.
 - To save time for repetitive tasks, you can automate tasks with BRAIN2 such as reporting on the printer, backup of the BRAIN2 database and reporting via e-mail.
