High performance
with a wide range of
solutions and options.

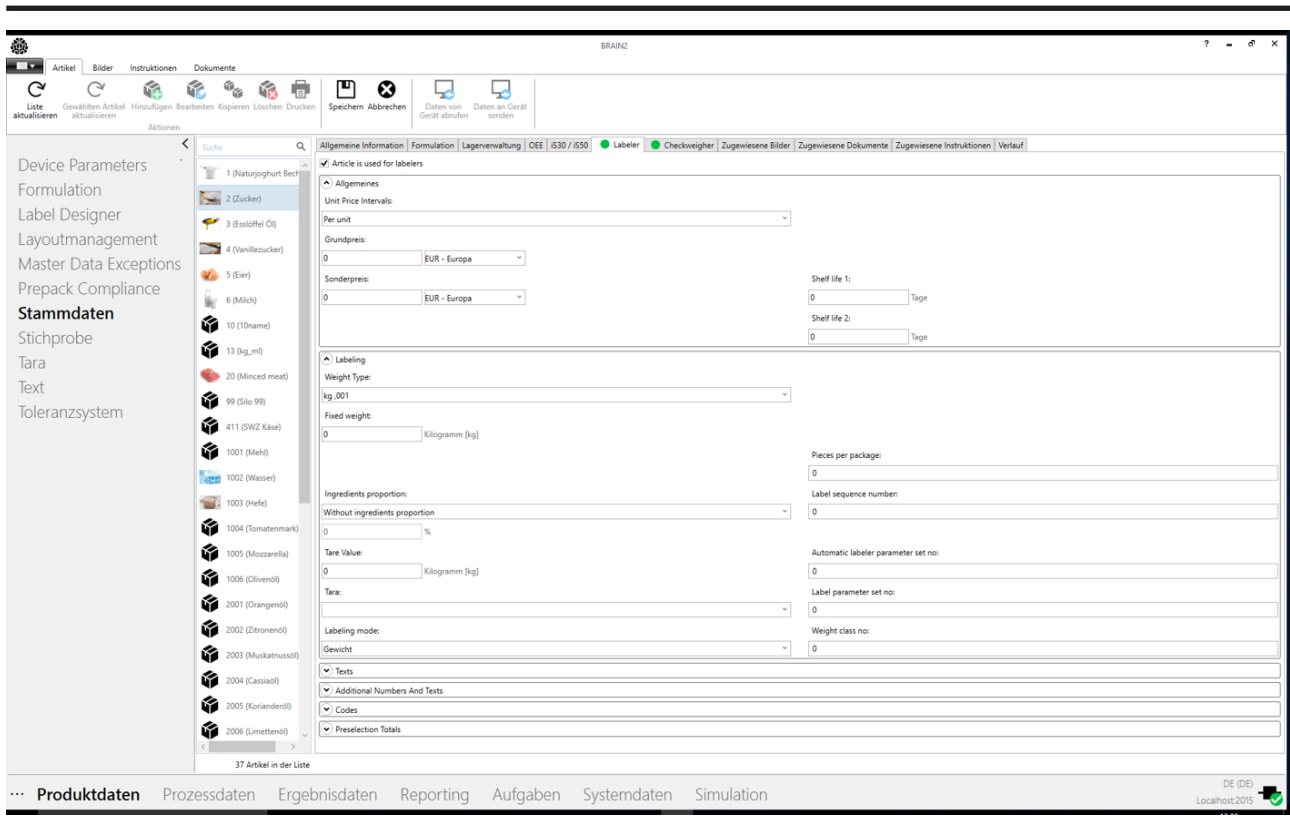

Product description

The master data maintenance tool BRAIN2 Data_Maintenance is closely linked to the Bizerba devices and further BRAIN2 applications. The user-friendly interface optimally shows the data structure of each Bizerba weigh price labeler and dynamic checkweigher. Benefit from a flexible BRAIN2 license model: matching the number of your devices you only acquire the number of licenses you actually need.

Properties

- Simple article maintenance on the pc
- Creating and managing customer data
- Central master data management including user management
- Flexible working with Bizerba devices

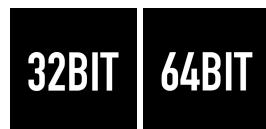

Provable benefit

BRAIN2 Data_Maintenance lets you maintain consistent/uniform data in weigh price labelers and checkweighers. The spectrum includes PLU data, texts, label parameters, code structure rules and weight classes. This data can be easily sent to your devices or received there.

Expanded functions

- Article maintenance: PLUs, general texts, date texts, static texts
- Device management: automatic labeler parameters, label parameters, weight classes
- System configuration: groups, machine groups, lines
- Upload/download of data on Bizerba equipment
- Data migration of the _dataMaintenance.BRAIN databases as from version 1.91
- Data import and export function
- Price promotion
