

BRAIN2 Order_Processing

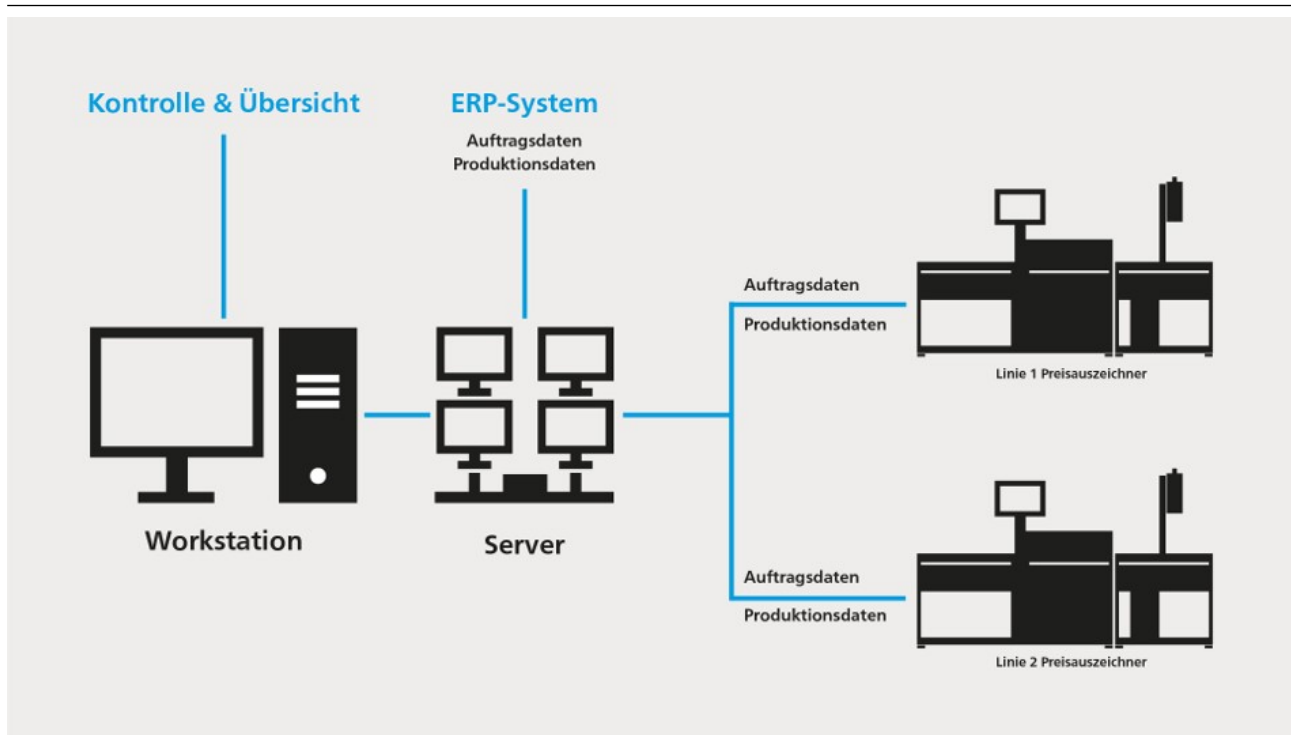

Ensure a time-saving and flexible workflow with BRAIN2 Order_Processing. The app automatically processes complete labeling orders directly from the ERP system and autonomously controls price labeling lines: It sends order-based production data to the systems. Fast, simple and safe. The lines label seamlessly. Whether individual orders with several articles or one article for different customers. The web-based app interface allows you to track the order status in real time. Whenever and wherever you like.

High performance
with a wide range of
solutions and options.

Product description

BRAIN2 Order_Processing offers you an economical key function for automated labeling processes. The app automatically supports you in the coordination of workflows in production. From order entry to order completion. One advantage is the quality of the data: Via BRAIN2 Order_Processing, order-based production data from the ERP system automatically switches to the recording lines. This way, errors caused by manual entries are avoided. You remain flexible in the order processing procedure: You can interrupt or delete running orders. The workflow adapts quickly and easily to short-term production changes. Also the completion of partially processed orders is possible at any time with BRAIN2 Order_Processing. When the order is finished, the app reports back the actual production data to the ERP system. Control order status and production when and where you want. With the web-based user interface, the app offers you transparency even on mobile devices.

Impressive unique selling points

- Web-based user interface
- Easily configurable
- Automatic control of all labeling jobs directly from the ERP system
- Compatible with all Bizerba weigh price labeling systems

Provable benefit

- Safe processing of all jobs through high data quality
- Economical and flexible production
- Transparent and mobile real-time control
